Academia

1054 Budapest, Akadémia utca 6.

Datasheet of the property: <https://robertson.makeitonline.hu/en/property/179-academia>

Reborn as Academia Irodaház, one of Budapest's best-located commercial properties directly on the Danube. The Academia Office Building combines classic luxury with modern technology to provide a professional work environment and outstanding customer experience. With the transformation, the newest tenant created a building that meets the expectations, offering innovative operation, convenience services and flexible office space on nearly 12,500 m2. The planned interior design and technical solutions, the renovation of the common areas and the office premises are carried out in the spirit of sustainability, and in addition to obtaining environmentally conscious certifications, the building also aims for net zero emissions. According to tenant requirements, up to 2,800 m² of contiguous office space can be created using quality materials. And the implementation of the ideas was ensured by the architectural and interior design solutions dreamed up by BUILDEXT, unique in the region, equipped with state-of-the-art technology. In the meantime, the complex has obtained the WiredScore-Gold certificate, and soon it will also boast the most popular green certifications in the real estate sector, such as BREEAM, WELL and Access4you.

The new reception desks of the Academia Office Building and the entrance gates equipped with the most modern technology have also received their final place in both wings. The two lobby areas have been connected, resulting in a much more spacious and modern space, so that the services become available to the tenants of both wings. The audio-visual technology of the conference room will be installed, so in the case of meetings and events of 12-60 people, the tenants and guests of the ACADEMIA office will also encounter the most modern technologies here. The developer also thought about innovative solutions and complete renovations below the surface of the earth, where modern ideas and digital elements were also given greater emphasis. The easiest access to the underground garage is facilitated by new high-speed gates and a license plate recognition system, which has already officially started operating. The lighting of the underground garage is provided by new, motion-sensing LED lights, while the waxing and painting of the four levels has also been completed. The Academia Office Building has separate changing rooms and numerous bicycle storage facilities for those traveling on two wheels, which also makes it easier for employees to get to work in comfort. Equipped with state-of-the-art solutions, the elevators were also renovated in both wings, digital displays were even installed in the mirrors. The designers and contractors of the ACADEMIA Office Building, paying attention to the historical and architectural characteristics of the beautiful building, simultaneously kept in mind the spectacular and modern design, as well as the most user-friendly solutions. Located in the capital's business, tourist and cultural district, the downtown office building also provides outstanding digital connections, smart solutions, accessibility and social functions in the spirit of ESG. The Academia Office Building is easily accessible by all means of public transport, by bicycle, car and on foot. The Chain Bridge, the Danube bank, the Parliament, St. Stephen's Basilica, many quality restaurants, cafes, hotels, conference rooms and retail outlets are within walking distance. Bicycle storage facilities and bicycle infrastructure near the office building make it easier for cyclists to access the building.
