In addition, the multiple services on the ground floor and in the walking-distance area will truly accommodate the requirements of a modern and environmentally conscious citizen. The M0-M3 motorways can also be reached in a short time by car. The primary aspect of the RoseVille development is to create a people-oriented workplace that fits perfectly into the historical townscape and serves the needs of tenants as a modern jewellery box. The 15,000 sq m exclusive office building is developed with the most advanced technologies and designs, and aims to attain the BREEAM "Excellent" rating, a highly environmentally aware construction and operational certification. In addition to the green certificates, full compliance with all the requirements of Access4You has received attention, which is unique in the Hungarian market. ATERNOR is the first developer that designs its projects together with the rehabilitation engineers supported by Access4you so that the buildings and their surroundings will be free of obstacles in every aspect and will offer possibilities, solutions for access that make everyday life easier for people with special needs and help them to develop a complete lifestyle and a daily working routine.
